

Expand your e-business
with the platform trusted by
the World's biggest brands.

X-coding IT Studio offer for Magento

Magento®

5 reasons

why to choose Magento
as a tool for e-Commerce:

1

Ease of integration

Magento is unbelievably easy to integrate with multiple external systems such as the courier, payment systems, ERP systems, auction services etc. It is the one and only e-Commerce complete package you need!

2

Special tools and functions

Magento offers a wide variety of specialized built-in tools that distinguish it from the competition, such as built-in SEO system, multi currency and different tax rates for different countries and recipients (updated in real time), internet marketing tools, creation of personalized shopping lists etc.

3

Security

Magento puts great emphasis on safety of its solutions, and therefore automatically the purchasing process together with the entire shop is secured with SSL certificate.

4

Ease of personalization

Magento allows for a high degree of personalization, making it even easier to create online shop that fully meets the needs of customers and stands out against the competition.

5

Innovation

Magento is one of the most promising e-Commerce platforms on the market. As a result, it is regularly updated by its authors, which ensures continuous access to current IT trends and technologies within the e-Commerce market, implementing quick fixes and a constant technical support from its authors and users.

Regardless of size of your business, Magento is the perfect solution, allowing you to enter and fully expand in the world of e-Commerce.

2013 most popular e-commerce software, source: Alexa's Top 1M Sites

Until May 2013, it was recorded over 500 000 installations of Magento, with over 60 regionalizations, and the number of modules exceeding 15 000.

Magento is one of the most flexible and scalable e-Commerce tools available on the market, and with open code, many companies have the opportunity to fully customize their own e-stores to their personalized needs. Some of the world's e-Commerce giants, have built their own online shops based on Magento software.
